Rack Mounting Solutions

Connect. Protect. Equip

Equip offers a comprehensive range of premium passive networking products, including cabling, mounting solutions, and networking infrastructure, serving installation companies, end-customers, and retail. Recently, we expanded our portfolio to include server and network cabinets, reinforcing our commitment to providing complete networking solutions.

Introduction

Equip presents a selection of cabinets for a variety of settings, from the simplicity of office installations to the rigors of outdoor environments. Our range includes the Basic Flex, Dynamic Flex, Eco Wall Mount, Pro Wall Mount, Safe Outdoor, and Slim Flex lines, each designed with practicality and efficiency in mind. Built from quality steel, these cabinets offer solid stability and a clean aesthetic that fits into any space.

At the heart of our designs is a focus on streamlined cable management and flexible configurations to support both active and passive network components. From the easily adjustable profile rails in our Basic and Dynamic Flex lines to the rugged, weather-resistant features of our Safe Outdoor cabinets, we've considered the needs

of users across different scenarios. The Eco Wall Mount, Pro Wall Mount and Slim Flex lines offer to those seeking reliable, space-saving solutions with easy installation.

Equip's approach is grounded in offering straightforward, reliable products that do their job well without unnecessary frills. We believe in making our customers' work easier through thoughtful design and durable construction, ensuring each cabinet line provides a practical solution for today's networking challenges. Explore our offerings to find the right fit for your needs, knowing that behind each Equip cabinet is a commitment to simplicity and functionality.

Content

Explanation of the Equip Codes/Names

At Equip, our cabinet naming system is as intuitive as the design of our products. The model name of each cabinet is a blend of abbreviation and specification that together provide a clear, quick reference to the product's key features. For instance, let's decipher the code "EBF-22-6060-B-BAAA":

"BF" stands for the product line, in this case, the Basic Flex line, indicating the foundational series of our product range.
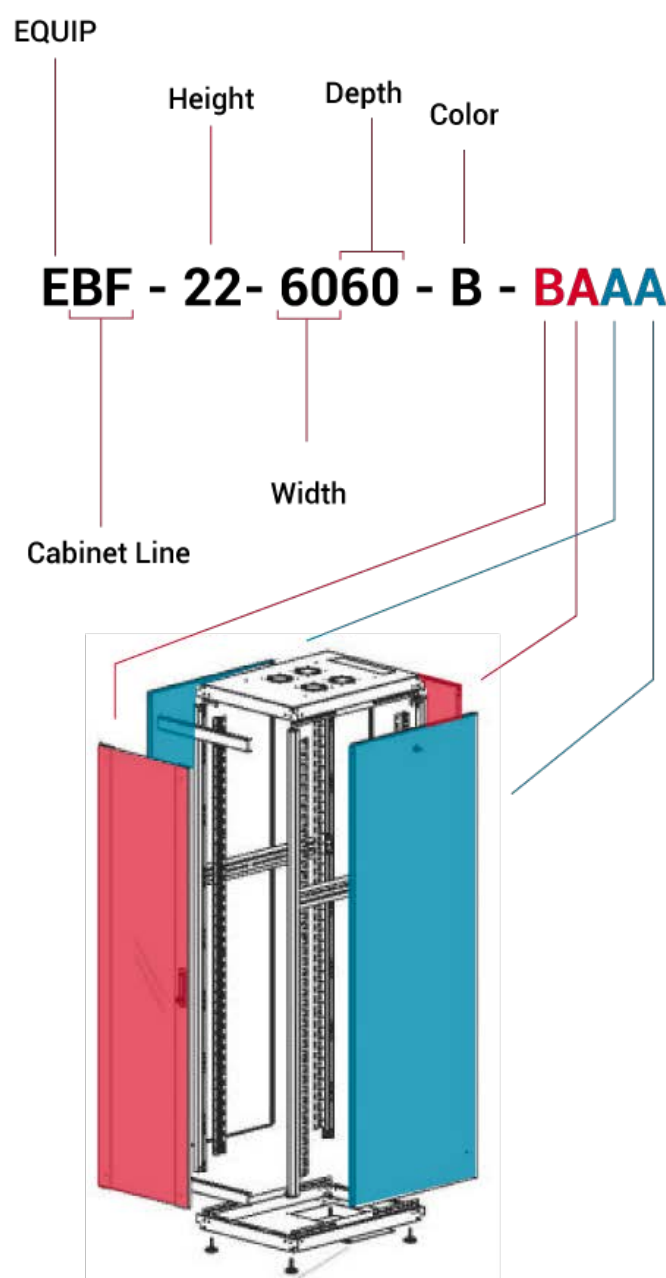

The first number, "22," represents the height of the cabinet in units (U), a standard measure in rack mounting that denotes the vertical space available.

The second set of numbers, "6060," details the depth and width of the cabinet, providing immediate insight into the size and space it occupies.

The letter "B" following the size indicates the color of the cabinet. In this nomenclature, "B" stands for black, aligning with the RAL color code 9005.

The final set of letters, "BAAA," specify various features or configurations unique to this cabinet model, such as the type of doors and side panels.

This straightforward system ensures that at a glance, the user or installer can understand the essential characteristics of the cabinet, facilitating selection and ensuring compatibility with their specific needs. It's a reflection of Equips commitment to efficiency and user-friendliness, from our product design right through to our product naming.
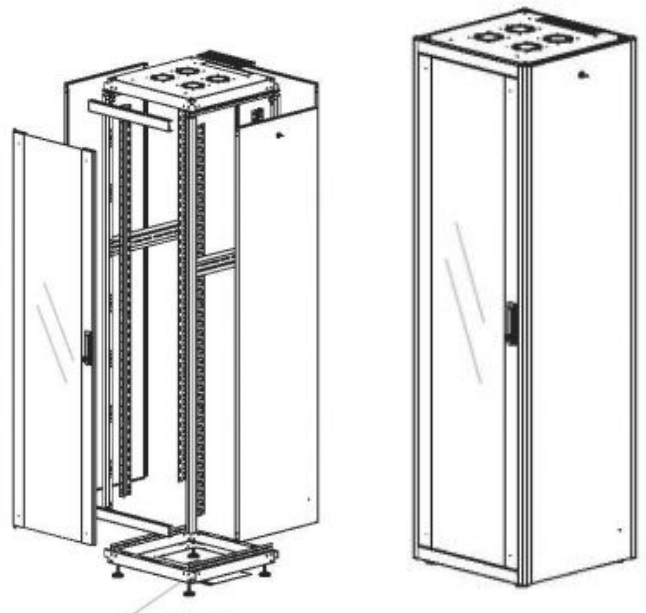

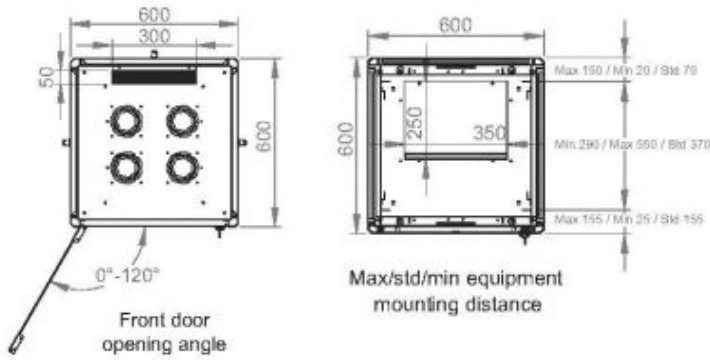

Basic Flex Line

The cabinets of the **Basic Flex Line** are engineered for the efficient and user-friendly installation of both active and passive network components, prioritizing streamlined cable management. Crafted from steel sheets up to 1.5 mm thick, every cabinet guarantees excellent stability, attributed to a unique plate curving technique, forming a sturdy steel framework.

The Basic Flex cabinets are finished with a powder coating in shades of grey (RAL 7035) and black (RAL 9005).

For challenging set-up locations that are less accessible, the cabinet is designed to be disassembled. The doors are easily detachable, and their stops can be switched between right and left orientations.
Additionally, the roof is prepped for the integration of an air ventilation unit. Inside, each cabinet houses two sets (4 pieces) of 483 mm (19") profile rails. These rails, galvanized and marked with height units readable from both directions, are adjustable in depth. To facilitate extensive equipment installations, they're paired with supplementary depth support bars.

Cable management is central to the design. The cabinet base features a punched-out cable entry shielded with a metal plate. For the broader 800 mm width cabinets, there are added punched-out cable entries covered with plastic on both sides. These entries are replicated on the roof, with one for 600 mm width cabinets and three for the 800 mm width ones. To cater to diverse operational needs, a wide assortment of accessories, including cable management tools and shelves, is readily available.

Dynamic Flex Line

Introducing the "**Dynamic Flex Line**" Cabinets: Designed for user-friendly installation of active and passive network components, these cabinets prioritize efficient cable management. Constructed from steel sheets up to 1.5 mm thick, each cabinet ensures exceptional stability, thanks to a unique plate curving technique.

The Dynamic Flex cabinets of Equip are elegantly finished with a powder coating in shades of grey (RAL 7035) and black (RAL 9005).

In scenarios where the installation location is hard to access, the cabinet can be effortlessly disassembled. Its doors are designed for easy removal, with the flexibility to switch the doorstop's orientation from right to left. The cabinet's roof features an additional lid, equipped with air ventilation slots to promote better airflow. It's also prepped for the addition of an air ventilation unit.

Internally, each cabinet boasts two sets (4 pieces) of 483 mm (19") profile rails, which are galvanized and feature height unit markings readable from both directions. These rails are adjustable in depth and come with extra depth support bars, ensuring comprehensive 483 mm (19") equipment installations.

A highlight of the design is the emphasis on cable management. The cabinet base incorporates a sliding cable entry panel sealed with rubber. Cabinets of 26U and above are outfitted with two cable entries featuring brush strips at the rear, both above and below the door.

The 800 mm width cabinets offer advanced cable management options, including additional cable entries with brushes on the top and base.

Additionally, these wider cabinets include vertical cable ducts with shutters on both sides, adjacent to the 483 mm (19") profile rails in the front. To address diverse operational needs, a comprehensive range of accessories, including cable management tools and shelves, is available, ensuring adaptability in everyday use.

Wall Mount Eco Line

Introducing the **Equip Eco Mount Wall Mount Cabinets**, engineered for seamless installation and efficient management of your network components, all while prioritizing elegant cable organization.

The Eco Wall Mounts come as a semi flat-pack solution for safer and more ergonomic logistics. The mounts are super easy to install and come with a manual and a short support video.

Crafted from robust steel sheets up to 1.5 mm thick, these cabinets stand as symbols of durability and strength, ensuring your valuable equipment remains secure. Available in sophisticated shades of grey (RAL 7035) and black (RAL 9005), our cabinets offer both functionality and aesthetics.

Whether you choose the 10' or 19' variant, the Equip Eco Mount series provides a hassle-free experience, whether wall-mounted or configured as standalone units. The door and side panels are designed for effortless detachment, and you have the flexibility to switch the door's orientation from right to left for your convenience.
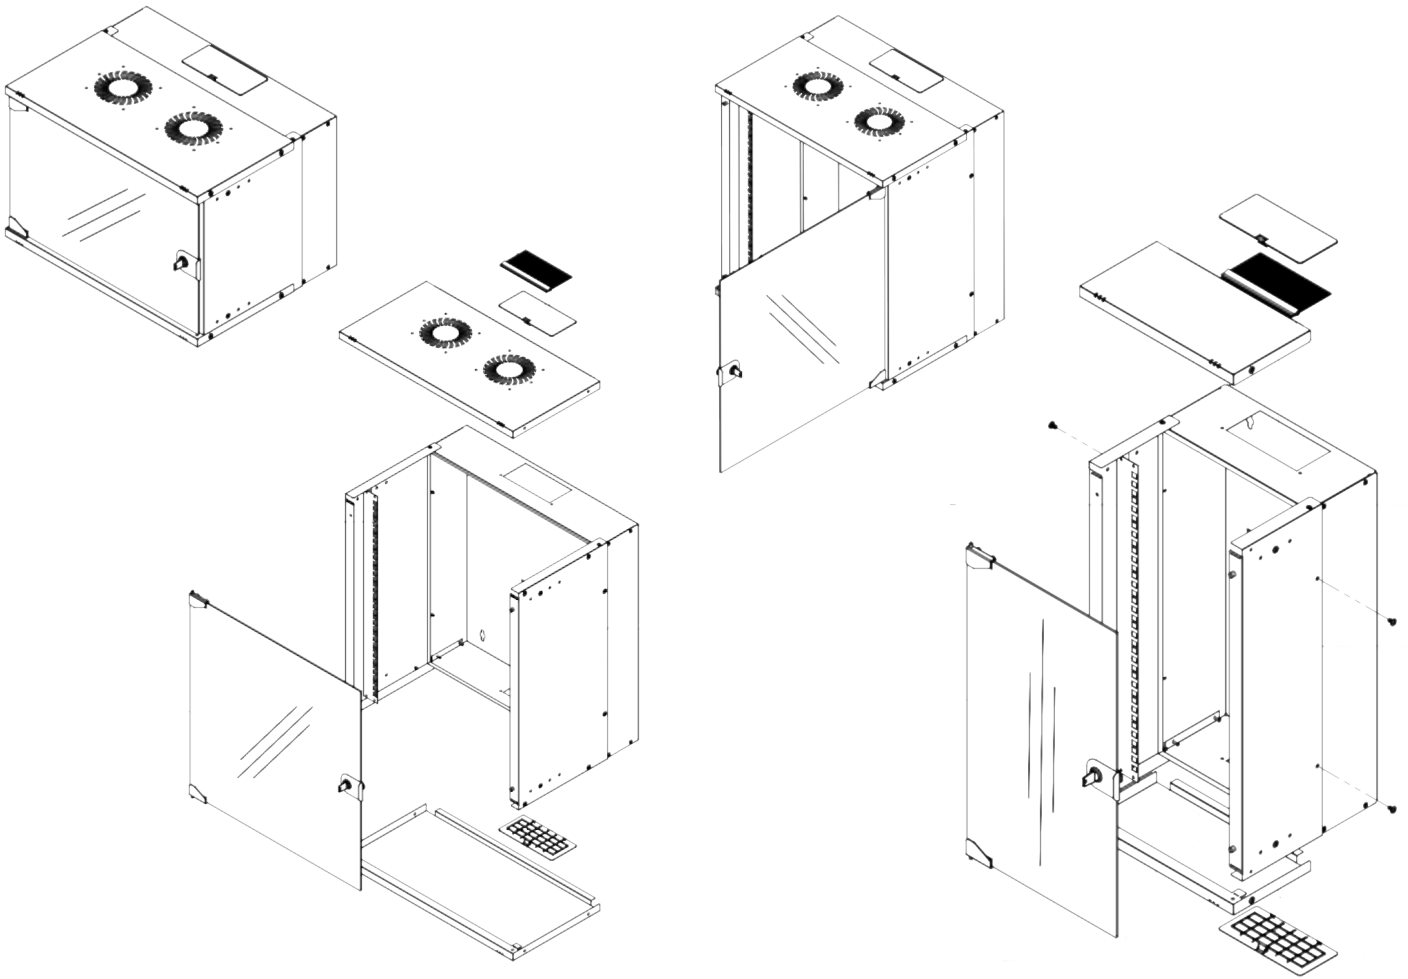

To enhance airflow and maintain an optimal operating environment, our cabinets feature integrated ventilation slots on the roof. Inside, you'll find a pair of pre-mounted 483 mm (19") profile rails, adjustable

in depth, and complete with readable height unit markings from both directions. The back frame includes 483 mm (19") punch-outs for added versatility. Efficient cable management is at the forefront of our design. The roof includes a sliding cable entry panel with a rubber seal for ease of access and organization. Punched-out cable entries with protective plastic covers are strategically placed on the rear wall and base.

Additionally, the rear frame is equipped with brushes on both the top and bottom to keep your cables tidy and well-organized. Our commitment to flexibility extends to a wide range of accessory options, including cable management tools and shelves, designed to meet diverse operational demands.

With the Equip Eco Mount Wall Mount Cabinets, you can optimize your IT infrastructure with confidence, knowing that your equipment is housed securely and efficiently. Choose Equip Eco Mount for a smarter, more organized, and reliable network cabinet solution, whether you need a 10' or 19' variant, and elevate the performance of your IT environment today.

Wall Mount Pro Line

Our Wall Mounting 'Pro Mount' Cabinets are tailored for a hassle-free and efficient setup of both active and passive network components, emphasizing sleek cable management. Constructed from steel sheets up to 1.5 mm thick, every rack stands out for its robustness and durability.

These cabinets are beautifully finished with a powder coating in shades of grey (RAL 7035) and black (RAL 9005). Wall mounting has been simplified for users, and for those preferring standalone configurations, individual levelling feet or castors are available.

The door and side panels are designed for easy detachment, with the option to switch the door's orientation from right to left. For enhanced air circulation, the roof features integrated ventilation slots. Each cabinet is equipped with a set of two pre-mounted 483 mm (19") profile rails. These rails are galvanized, feature height unit markings readable from both directions, and are adjustable in depth. The back frame also incorporates 483 mm (19") punch-outs.

Prioritizing efficient cable management, the roof boasts a sliding cable entry panel with a rubber seal. Punched-out cable entries with plastic covers are found on the rear wall and base, and the rear frame offers brushes on both the top and bottom. To fulfil a variety of operational demands, an extensive range of accessory options, such as cable management tools and shelves, is available.

Wall Mount Slim Line

The Slim Flex Wall Mounting Cabinets are ideal for housing both active and passive components. Designed for simplicity, they enable swift and hassle-free installations.

Their contemporary design seamlessly blends into office or home settings. Users are presented with dual installation options: The front side features a versatile 3U rail that can rotate vertically, be set horizontally, or even angled. The rear side has a fixed 2U rail, suitable for passive network components, for instance. The lower housing area has pre-punched mounting holes to accommodate non-rack-mountable equipment like DSL routers. Alternatively, a device mounting plate can be added, which is available separately.

Safe Outdoor Line

The "Safe Outdoor" Cabinet Line presents the 483 mm (19") IP55 Outdoor Wall Mount Cabinets, tailored for industrial use. Adhering to the IP55 safety standard as per EN 60529, they offer resistance against both water and dirt infiltration.

Enhanced security is ensured with a 3-point-locking system complemented by a lockable swing handle and insulated cable entry points. The cabinets also feature integrated air ventilation slots for fresh air circulation, maintaining protection against water and dust as per IP54 standards.

These cabinets are ideal for locations exposed to environmental elements like rain, dust, sleet, snow, and splashing water. For more flexibility, these cabinets can be paired with a plinth for standalone setups. When using the plinth, rear mounting holes can be sealed using plugs sourced from the cabinet's base.
